Каталог открытых данных Организации Экономического Сотрудничества и Развития

The screenshot shows the OECD Statistics homepage. At the top, there's a navigation bar with links to 'OECD Home', 'About', 'Countries', 'Topics', 'Statistics' (which is highlighted in blue), and 'Newsroom'. Below the navigation bar, there's a section titled 'OECD Data Lab' which includes a chart titled 'Economic Outlook key indicators' showing projections for GDP growth, unemployment, and other key macro-economic indicators. To the right of the Data Lab is a 'Resources' section with links to 'List of all statistics', 'Glossary', 'OECD Factbook Indicators', and 'Tools for statisticians'. The main content area is titled 'List of key indicators' and contains a table with 10 entries. Each entry has a 'Keyword' column, an 'Indicator' column, a 'Table' column with download links for Excel and Real-time dataset, and a 'Real-time dataset' column with a link to get real-time data. The entries are as follows:

Keyword	Indicator	Table	Real-time dataset
Africa	African economies: basic indicators	Download Excel	
Agriculture	Consumer support estimates (subsidies)	Download Excel	Get real-time data
	Environment: agriculture	Download Excel	
	OECD Producer single commodity transfers	Download Excel	
	OECD Total support estimates	Download Excel	
	Producer support estimates (subsidies)	Download Excel	Get real-time data
	Wheat production	Download Excel	Get real-time data
	World cereal projections	Download Excel	
World prices	Download Excel	Get real-time data	
World trade projections, exports	Download Excel	Get real-time data

Каталог открытых данных Организации Объединенных Наций

The screenshot shows the homepage of the UNdata website. At the top is the UNdata logo with the tagline "A world of information". Below the logo is a navigation bar with links for "Data", "Glossary", "Metadata", and "More". A search bar is present, along with a message indicating "34 databases - 60 million records" and a link to "Update calendar". The main content area is divided into three sections: "Databases", "Updates", and "Country data services". The "Databases" section lists "Crime" (with a link to "UNODC Homicide Statistics 2012, UNODC") and "Education" (with a link to "UIS Data Centre, UNESCO"). The "Updates" section features a "Follow Us On Twitter" button. The "Country data services" section lists countries: Afghanistan, Albania, Algeria, Andorra, and Angola. Below these sections are links for "MBS Monthly Bulletin of Statistics and other UNSD data resources", "Popular searches", and "Feedback and reviews". At the bottom of the page is a row of logos for various UN agencies, followed by a footer with links to "Home", "About Us", "FAQ", "Feedback", and "Site usage".

Международный каталог порталов открытых данных

The screenshot shows the homepage of datacatalogs.org. At the top right are 'Login' and 'Register' buttons, and a search bar with the placeholder 'Find data catalogs'. Below the header are three circular icons: one with a download arrow, one with lightbulbs, and one with three people. A central text box states: 'a comprehensive list of open data catalogs curated by experts from around the world.' To the right, a box titled 'Recently Changed Catalogs' lists several entries: 'Offene Behördendaten der Schweiz', 'Gent Data Catalogue', 'Open Data Aarhus', 'Open Data for Zimbabwe', and 'Open Data for Zambia'. A link 'View revision log »' is also present. At the bottom left, there's a 'Find data catalogs' search bar with a magnifying glass icon, and at the bottom center, a note: 'OPEN DATA All content licensed under the Open Database License. Powered by CKAN v1.5.1.'

Worldwide Open Data Sites

2013 AUGUST 8

by Ben Jones

Hi, it's been a while since I posted last! The Tableau Public team has been busy [launching author profiles](#) (here's [mine](#)) and expanding the free application's data limit from 100k rows to [1M rows](#), so I haven't posted very often this summer. After wrapping up another project I'm working on, I'll pick it back up again here at DataRemixed.

In the meantime, I thought I'd share a handy dandy tool that helps users find Open Data sites around the world.

In researching sites to give users who are looking to find data to play with, I came across a data.gov website called "[Open Data Sites](#)" that provides a [csv file](#) containing a bunch of links to sites (292 294 of them) from different countries (48 50 different ones, to be exact). To get to the sites, you have to download the csv, open it, and click the links. Not the best workflow, so I created this viz to 'lean out' the process, which I hope you also find useful:

Open Data Site Finder

Countries: Sites:

Open Knowledge Foundation

The screenshot shows the DataHub website interface. At the top, there is a navigation bar with links for 'Log in' and 'Register', and categories 'Datasets', 'Groups', and 'About'. A search bar is also present. Below the navigation, there are two main sections: 'Give your data a home' and 'Find data'. The 'Give your data a home' section includes a button labeled 'Publish data for free'. The 'Find data' section has a search input field. A central banner reads 'the free, powerful data management platform from the Open Knowledge Foundation'. Below the banner, there is a 'Popular Tags' section with a list of tags like 'city-government', 'lod', 'publications', 'Senegal', 'ANSI', 'menages', 'donnees', and 'format-rdf'. Two dataset cards are displayed: one for 'Senegal' featuring the Senegalese flag and another for 'Canada' featuring the Canadian flag. Both cards have 'FEATURED' badges in the top right corner.

Каталог открытых данных Евросоюза

The screenshot shows the homepage of the European Union Open Data Portal. At the top, there is a navigation bar with links for 'Legal notice', 'Contact', 'Search', and 'English (en)'. Below the navigation bar, the portal's logo 'europa.eu' and the text 'European Union Open Data Portal BETA' are displayed. A breadcrumb menu shows the current location as 'Europa > Open Data Portal > Home'. The main menu includes 'Home', 'Data', 'Applications', 'Linked Data', and 'About'. To the right of the menu, there is a link for 'Data provider's area' and a colorful horizontal bar. Below the menu, there is a search bar with a magnifying glass icon. A message states that the portal contains 6092 datasets. The central part of the page features a large blue graphic of a folder containing a wind turbine, a person holding a sign, and a computer monitor. Below this graphic, there is a welcome message: 'Welcome to the European Union Open Data Portal' and 'What is this Data Portal about?'. A question follows: 'Are you looking for easy access to EU data? Do you want to reuse data for research, an article, an application or something else?'. A footer section includes links for 'Blogs', 'Digital Agenda for Europe', and 'Tweets' (with a link to follow @EC_opendata). There is also a small 'CC' logo.

OPEN DATA SITES

Data.gov is leading the way in democratizing public sector data and driving innovation. This movement has spread throughout cities, states, and countries.

U.S. States	U.S. Cities and Counties	International Countries	International Regional
39	42	43	160

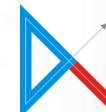

Download the full list of Open Data Sites in the following formats: [\[CSV\]](#) | [\[EXCEL\]](#)

If you would like to be part of this community and help to shape its future, [join in the discussions](#) going on now.

We are encouraging and working with countries, cities, and organizations internationally, who have launched their own sites with access to machine-readable data. Details on open data sites in the United States can be found by clicking on the map of the United States. The maps for other countries link to the national open data site. If a country has both national and local open data sites, these are noted by clicking on the flag for that country below.

US Government Web Services and XML Data Sources

Welcome to USGovXML. USGovXML is an index to publicly available web services and XML data sources that are provided by the US government. USGovXML indexes data sources from all 3 branches of government as well as its boards, commissions, corporations and independent agencies. USGovXML documents, in one place and in a uniform manner, the web services and XML data sources that are provided by the US government. It includes detail information about the data source (i.e. name, description, links to documentation, tech support, etc.) as well as source code snippets (written in C#) to help developers better understand how the data sources can be used. When snippets are presented, the projects in which those snippets were extracted can be downloaded as zip files. If an example is available, the [Example](#) link on the page describing the data source will be highlighted. Clicking on the link will redirect you to a location that contains the zip file. To use these projects, developers will need [Visual Studio 2008](#) (or later), [.Net Framework 3.5](#) (or later) and a connection to the internet.

Mobile Web Apps

As a demonstration of the utility of these publicly available data sources, some of them have been used to create mobile web apps which can be accessed from the browser on a tablet or smart phone! These web apps are available at: <http://USGovXML.com/Mobile/>. The apps are also available at the [Firefox Marketplace](#) and the [Google Chrome Web Store](#).

SMART Health IT

SMART (Substitutable Medical Apps, Reusable Technologies) is one of four [Strategic Health IT Advanced Research Projects](#) (SHARP) funded by the Office of the National Coordinator for Health Information Technology. SMART provides a unified mechanism for diverse applications to interact with medical record data. SMART Apps built against the SMART API can be embedded within any SMART Container.

A SMART Container is, most often, an Electronic Medical Record (EMR) system used by physicians but might also be a Personal Health Record (PHR) such as [Indivo](#) used by patients, a data-analytics platform such as [i2b2](#) used by researchers or a clinical data repository system for HIEs (Health Information Exchange) such as [Mirth Results](#). A partial list of the systems and companies that have already implemented SMART can be found [here](#).

USGovXML has created [rxInfo: A suite of SMART Apps](#). The rxInfo suite of SMART apps are available ... [here](#) If you have implemented or are in the process of implementing a SMART container and need SMART apps to test your implementation, we would like to hear from you! Send us a link to your container's sandbox when you contact us.

Are you a C#/Net developer? Do you want to create a SMART app? If the answer to both questions is yes, USGovXML.com has created a sample SMART web app that is available as a Visual Studio 2008 project. The project can be downloaded from: <http://usgovxml.com/examples/Public/SMARTWebApp.zip>. Make sure you read the included `readme.txt` file for details.

Help for Homeless Veterans

VetHelp is a web based application for tablets and smart phones that provides easy access to resources needed by homeless veterans and the people that help them; when they need it and where they can get it. VetHelp was designed with the homeless veterans of Monmouth County, NJ in mind. However, veterans all over the United States should find it to be useful. VetHelp is available at: <http://USGovXML.com/VetHelp/>

HealthGuide

The USGovXML HealthGuide is a comprehensive and authoritative source of medical information; information contained in U. S. Department of Health and Human Services databases. With it's search capabilities, you can obtain trusted and reliable information about drugs, medical conditions, health care providers and support groups. The HealthGuide is also a conduit to even more detailed information hosted in U. S. Department of Health and Human Services web sites. The HealthGuide is available at <http://USGovXML.com/HealthGuide/>

Developer Resource Hubs

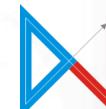

Many federal agencies have begun to recognize the needs of independent developers and are making efforts to ensure that those developers have the information they need. Rather than requiring that developers track down publicly available data sources and APIs, the agencies listed below have consolidated them into Developer Hubs on their web sites.

BusinessUSA
Census Bureau
Centers for Medicare & Medicaid Services
Commerce - Automated Export System
Consumer Financial Protection Bureau

Открытые данные

В настоящем разделе представлена информация о деятельности Минэкономразвития России и подведомственных Министерству федеральных службах и агентствах, размещаемая в сети «Интернет» в форме открытых данных.

Размещение государственными органами и органами местного самоуправления информации о своей деятельности в сети «Интернет» в форме открытых данных - форма размещения государственными органами и органами местного самоуправления информации о своей деятельности в сети «Интернет», при которой указанная информация размещается в сети «Интернет» в виде массивов данных, организованных в формате, обеспечивающем их автоматическую обработку в целях повторного использования без предварительного изменения человеком (машиночитаемый формат), и на условиях ее свободного использования.

Размещение государственными органами и органами местного самоуправления информации о своей деятельности в сети «Интернет» в форме открытых данных осуществляется в рамках реализации подпункта «г» пункта 2 Указа Президента Российской Федерации от 7 мая 2012 года № 601 «Об основных направлениях совершенствования системы государственного управления».

Условия использования.

Пользователь может использовать (в том числе повторно) открытые данные свободно, бесплатно, бессрочно, безвозмездно и без ограничения территории использования, в том числе имеет право копировать, публиковать, распространять открытые данные и объединять их с другой информацией, использовать открытые данные в коммерческих целях, использовать для создания программ для ЭВМ и приложений.

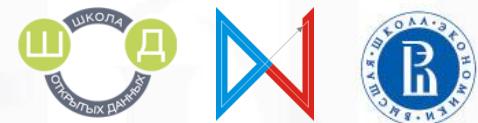

При использовании открытых данных Пользователь обязан:

- использовать открытые данные только в законных целях;
- не искажать открытые данные при их использовании;
- сохранять ссылку на источник информации при использовании открытых данных.

Summer meeting programme finalised
Published by Jan Bräse on 12 August 2013 - 9:47pm

6 weeks prior to the next DataCite summer meeting in Washington DC September 19-20 we are pleased to announce the publication of the final programme for the event.

Join us there to learn about the latest developments in data citation from Figshare, Force11, Thomson Reuters, Elsevier, CODATA and many more. [The full programme is available here](#), where you can also register for free.

We are looking forward to seeing you in Washington, D.C. in September.

Хранилища данных научных организаций. Australian National Data Service

The screenshot shows the homepage of the Australian National Data Service (ANDS). At the top left is the ANDS logo. A search bar at the top right contains the placeholder "Find Research Data:" and a "Search" button. To the right of the search bar are links to "ANDS Home", "Contact Us", and "Guides". Below the search bar is a banner featuring a close-up of a leaf and a network diagram.

The main title "Australian National Data Service" is centered above the tagline "Our Vision: More Australian researchers reusing research data more often". Below this, a diagram illustrates the transformation from unstructured data to structured collections:

Data that are:	to	Structured Collections that are:
Unmanaged	→	Managed
Disconnected	→	Connected
Invisible	→	Findable
Single-use	→	Reusable

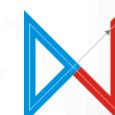

A "More>>" link is located to the right of the diagram. Below the diagram, there is a section titled "Australian Research Data Commons" which discusses the creation of a cohesive collection of research resources from all research institutions. There is also a section about "Research Data Australia" and a link to search for research data on researchdata.and.org.au.

On the right side of the page, there is a sidebar titled "ANDS News" featuring three news items with images: "Subscribe to andsUP" (with a link to subscribe), "Congratulations" (about the University of Western Australia completing its ANDS-funded project), and "eResearch Australasia 2013" (about an eResearch workshop).

Below the news sidebar is a "ANDS Quick Links" section containing links to "Contact Us", "Guides", "Content Providers Guide", "ANDS Services", "share - ANDS Newsletter", "Acknowledge ANDS funding", "Community Bulletin Board", and "Costs and Benefits of Data Provision".

At the bottom of the page, there is a footer section titled "The ANDS Members are:" showing logos for Monash University, ANU, and CSIRO. A small note at the bottom states: "ANDS is supported by the Australian Government through the National Collaborative Research Infrastructure Strategy."

Онлайн-сервисы

Amazon Web Services.

Общедоступные наборы данных

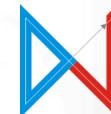

The screenshot shows the Amazon Public Data Sets page. At the top, there's a navigation bar with the Amazon logo, a 'Sign Up' button, 'My Account / Console', and language selection ('English'). Below the navigation is a search bar and links for 'AWS Products & Solutions', 'Public Data Sets', 'Developers', and 'Support'. On the left, there's a sidebar titled 'Browse By Category' with links to various datasets like Astronomy, Biology, Chemistry, Climate, Economics, Encyclopedic, Geographic, and Mathematics. Another sidebar titled 'Developer Resources' includes links to Amazon Machine Images (AMIs), Articles & Tutorials, Customer Apps, Developer Tools, Documentation, Release Notes, Sample Code & Libraries, Security Center, and Videos & Webinars. The main content area is titled 'Public Data Sets' and describes the service as a centralized repository for public datasets. It features three highlighted datasets: 'Common Crawl Corpus', '1000 Genomes Project', and 'Google Books Ngrams'. Below these, there's a section showing results 1-25 of 53, with a 'Sort by' dropdown set to 'Date - newest first'. Two specific datasets are detailed: 'Common Crawl Corpus' and 'Ensembl Annotated Human Genome Data (FASTA Release 68)'. Both entries include a brief description, the last modified date, and a link to the dataset.

Showing 1-25 of 53 results. Sort by: Date - newest first

Common Crawl Corpus
A corpus of web crawl data composed of over 5 billion web pages. This data set is freely available on Amazon S3 and is released under the Common Crawl Terms of Use.
Last Modified: Nov 29, 2012 9:01 AM GMT

Ensembl Annotated Human Genome Data (FASTA Release 68)
The Ensembl project produces genome databases for human as well as over 50 other species, and makes this information freely available.
Last Modified: Sep 4, 2012 23:15 PM GMT

Проект Figshare

The screenshot shows the Figshare homepage. At the top, there's a navigation bar with the Figshare logo, a search bar, and links for 'My data', 'Browse', and 'Upload'. A user profile for 'I. Radchenko' is also visible. The main content area features a large text block about the repository's purpose: "figshare is a repository where users can make all of their research outputs available in a **citable**, **shareable** and **discoverable** manner." Below this, a section explains how Figshare allows users to upload various file formats for visualisation. There are three buttons at the bottom of this section: "See our features", "Read the FAQs", and "or get in touch.". To the right, a sidebar titled "Tweets" displays three recent tweets from users Subhajit Ganguly, Sarah Pohl, and Erin McKiernan, each with a link to their profile and a "Follow @figshare" button. At the bottom, there are sections for "What people are saying..." with quotes from Tim O'Reilly, Jason Snyder, and Anthony Salvagno, along with their names and titles.

figshare is a repository where users can make all of their research outputs available in a **citable**, **shareable** and **discoverable** manner.

figshare allows users to upload any file format to be made visualisable in the browser so that figures, datasets, media, papers, posters, presentations and filesets can be disseminated in a way that the current scholarly publishing model does not allow.

See our features Read the FAQs or get in touch.

What people are saying...

A really important update to the scientific publishing process: figshare.com allows researchers to share data, negative results #bigwin

Tim O'Reilly
Founder and CEO, O'Reilly Media

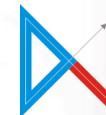

figshare is one of the greatest new tools for scientists

Jason Snyder
Post-doc, University of Toronto

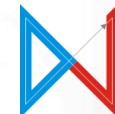

figshare has changed the way I think about publishing. Now I see endless possibilities

Anthony Salvagno
PhD Student, University of New Mexico

Проект Area51

The screenshot shows the Area51 proposal page on Stack Exchange. The header features the Stack Exchange logo and navigation links for log in, chat, discuss, faq, users, and badges. The main title is "AREA51" with the subtitle "New Site Staging Zone". A cartoon illustration of a alien in a rocket ship is visible in the background.

Area 51 » Technology

Open Data
Beta Q&A site for developers and researchers interested in open data.

133 days in beta [Visit!](#)

1.2 questions per day

96% answered

48 avid users
1,279 total users

2.5 answer ratio

192 visits/day

Needs Work - 15 questions per day on average is a healthy beta, 5 questions or fewer per day needs some work. A healthy site generates lots of good content to make sure users keep coming back.

Excellent - 90% answered is a healthy beta, 80% answered needs some work. In the beta it's especially important that when new visitors ask questions they usually get a good answer.

Needs Work - Every site needs a solid group of core users to assist in moderating the site. We recommend:

- 150 users with 200+ rep (currently **48 users** with 200+ rep)
- 10 users with 2,000+ rep (currently **0 users** with 2,000+ rep)
- 5 users with 3,000+ rep (currently **0 users** with 3,000+ rep)

Excellent - 2.5 answers per question is good, only 1 answer per question needs some work. On a healthy site, questions receive multiple answers and the best answer is voted to the top.

Needs Work - 1,500 visits per day is good, 500 visits per day needs some work. A great site benefits people outside the community. Eventually, 90% of a site's traffic should come from search engines.

Visit the site now!

List of countries by carbon dioxide emissions

From Wikipedia, the free encyclopedia

This is a list of sovereign states and territories by carbon dioxide emissions due to certain forms of human activity. The data presented below corresponds to emissions in 2008. The data was collected by the United States Department of Energy's Carbon Dioxide Information Analysis Center (CDIAC) for the United Nations. The data only considers carbon dioxide emissions from the burning of fossil fuels and cement manufacture, but not emissions from land use, land-use change and forestry. The top 10 countries in the world emit 67.07% of the world total.^{[1][2][3][4][5]} Other powerful, more potent greenhouse gases are not included in this data, including methane.

Some dependencies and territories whose independence has not been generally recognized are also included as they are in the source data. Certain entities are mentioned here for purposes of comparison. These are indicated in *italics* and are not counted in the ordering of sovereign states.

Contents [hide]

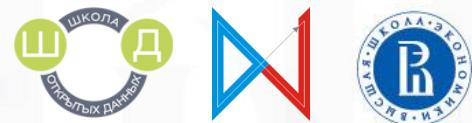

- 1 List of countries by 2008 emissions
- 2 List of countries by 2009 emissions estimates
- 3 List of countries by 2010 emissions estimates
- 4 List of countries by 2011 emissions estimates
- 5 See also
- 6 Notes and references
- 7 External links

Countries by carbon dioxide emissions in thousands of tonnes per annum, via the burning of fossil fuels (blue → the highest).

China CO₂ emission in millions of tonnes from 1980 to 2009.

Country	Annual CO ₂ emissions (in thousands of tonnes)	% of world emissions	source
World	29,888,121	100%	UN Estimate ^[6]
China (ex-Macau, Hong Kong)	7,031,916	23.5%	UN Estimate ^[6]
United States	5,461,014	18.27%	UN Estimate ^[6]
European Union (27)	4,177,817	13.98%	UN Estimate ^[7]
India	1,742,698	5.83%	UN Estimate ^[6]

Russia Overview

Russia is located in The Former Soviet Republic with a population of 141.92 million people. It has a population density of 8.73 persons per square kilometer. 26.00% of the population is rural and 74.00% is urban. 15.45% of the population is under the age of fifteen, and 12.96% of the population is over the age of 65. Russia's population grew by 0.40% in 2012. Net migration to Russia in 2010 was 1,135,737 people.

Russia is a high income country with a large-sized economy. In 2012 Russia's GDP was USD 2,022 billion. Russia's GDP grew at 3.40% in 2012. GDP per capita, in purchasing power-adjusted dollar terms, is USD 17,709.

Inflation in Russia, as measured by the change in consumer price index, was 5.10% in 2012, versus 8.40% in 2011. Unemployment in Russia in 2012 was 6.00%, versus 6.60% in 2011.

Russia's economy is predominantly services-based. Agriculture accounts for 4.25% of GDP and employs 9.70% of the population. Manufacturing and industry accounts for 37.00% of GDP and employs 27.90% of the population. Services accounts for 58.75% of the GDP and employs 62.30% of the population.

Russia's currency is the Russian Rouble (RUB). The latest exchange rate, as of 16-Sep-2013, is 32.56 RUB per 1 USD.

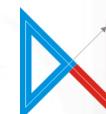

Russia is politically unstable, and life expectancy at birth is 69 years. 5.00% of Russia's population is under-nourished, while 46.48% of its male population and 51.71% of its female population is overweight. n.a. of the population smokes. Russia spends \$1,316.32 per capita (USD PPP) on healthcare, and has 8.05 nurses per 1000 people.

Набор данных по выбросу углекислого газа в атмосферу на сайте Международного энергетического агентства (МЭА)

The screenshot shows the EIA's International Energy Statistics page. The top navigation bar includes links for Tools, Learn About Energy, News, Sources & Uses, Topics, and Geography. The main content area displays a table of Total Carbon Dioxide Emissions from the Consumption of Energy (in Million Metric Tons) for various countries and regions. The table includes columns for Country, Product, Unit, and several indicators like CO2 Emissions, Carbon Intensity, and Electricity Prices. The data shows significant emissions from Russia and the Middle East.

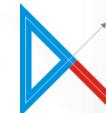

Country	Product	Unit	CO2 Emissions	Carbon Intensity	Electricity Prices	Petroleum Prices	Natural Gas Prices	Heat Content
Kazakhstan	Total Carbon Dioxide Emissions from the Consumption of Energy (Million Metric Tons)	Million Metric Tons	101.303	104.315	109.190	110.700	105.355	
Kyrgyzstan			5.125	5.152	7.883	7.477	7.793
